## Seat cushion

Netti Sit

Good pressure distribution and stabilizing properties.  
The foam properties are adapted to the size of the cushion – and therefore the user's weight.  
No adaptation and adjustment necessary.  
Temperature stabilizing cover available to secure a good micro climate and prevent pressure ulcers.

Varilite Evolution PSV

For wheelchair users with a high degree of tissue breakdown and symmetric positioning needs.

VARILITE's PSV takes guesswork out of cushion adjustment and makes it automatic. Evolution PSV uses VARILITE's revolutionary new Pressure Setting Valve (patent pending). The PSV works by sensing the amount of internal cushion pressure. As air is released, internal pressure decreases and the user is immersed in the cushion for effective pressure distribution.

Varilite Meridian TM

Therapists recommend the Meridian for individuals with motor and neurological dysfunction due to spinal-cord injury, stroke, multiple sclerosis, cerebral palsy, and traumatic brain injury. Therapists value the integral pre-ischial ridge and wedge effect created by the Meridian's dual chambers. User and caregivers value its low weight, comfort, and ease of use. No pumps or accessories. No kneading or manipulation.

Varilite Stratus

The Varilite Stratus Cushion is a great choice for people who have a moderate to low risk of tissue breakdown and moderate positioning needs. The cushion has a unique self-inflating valve, which allows air in and out of the cushion so it can contour to the user's shape.
